# How to Install BobMarks LITE for MSIE

(To print this page out, hit **<Ctrl>P**)

1. Unzip *bobmrkie.zip* to your "C:\Windows\Temp" directory, and double-click on the *BobMarksIEtrial.exe* file. You will see a dialogue box as shown.

2. Click on the button marked **Unzip** to install the BobMarks into your "C:\Windows\Favorites" folder. You don't have to enter this destination onto the line where it says "Unzip to Folder". It will happen automatically.

That's it! You're done! When you next launch Internet Explorer, your **BobMarks** will be there. And **BobMarks** will not eliminate your existing bookmarks, but will blend right in with them!

Enjoy! And thanks!
