

PABC

PABC.TEXT Copyright 1983, 1984 by Apple Computer, Inc.

17-Apr-84: added phrases 44 & 45
 16-Apr-84: added heap scrambling commands
 15-Apr-84: added phrase 43
 11-Apr-84: remove blank line before sign strings; fixup clipboard file/print menu
 11Apr84: added phrases 132 and 41 & 42

This is the generic phrase file included by ToolKit application phrase files
 NOTE: The wording of the alerts may not conform to the standards of the
 first release applications

?

WAIT
 STOP
 NOTE
 CAUTION
 Cancel
 OK

1 note alert

Alert ?N has no matching entry in the phrase file. ?L
 The last command was ?C.

2 stop alert

?0 is experiencing technical difficulties in accessing the disk that has
 the ?0 tool. ?L ?L
 It would probably be a good idea for you to Put Back your documents one at a time or
 to push the on-off button to save them all. ?L ?L
 If the problem recurs, refer to Appendix 1, Error Messages, in the ?0 manual.

: phWordDelimiters= 9;

xAx x9x xSx xTx x.9 x. & 9,9 A'A A-A ABA ABA A.A

: phTrouble = 10; {The tool is having trouble}

10 stop alert

?0 is experiencing technical difficulties.

: phUnknown = 11; {phrase(error) is undefined for this error}

11 stop alert

?0 has an unknown error.

: phNoText = 21; {font change or style changed command was done with no text selected}

21 stop alert

You cannot do that because no text is selected.

: phNoSel = 22; {the application could not do the command & there was no selection}

PROCEDURE {TSelection.} CantDoIt
 PROCEDURE {TSelection.} DoCutCopy
 PROCEDURE {TSelection.} DoKey
 PROCEDURE {TWindow.} NewStdCommand

22 stop alert

You cannot do that because nothing is selected.

: phNoInsPt = 23;

23 stop alert

You cannot do that because there is no insertion point.

: PROCEDURE {TDocument.} RevertVersion

: phRevert = 24;

24 caution cancel alert

Do you want to revert to the version saved ?1?

: phRevBlank = 25;

25 caution cancel alert

Do you want to revert to a blank document?

: phUnkCmd = 26; {the application could not handle a particular menu command}

PROCEDURE {TSelection.} NewCommand

26 stop alert

?0 cannot do "?1"

: phSelCant = 27; {same as 22, except there was a selection}

PROCEDURE {TSelection.} CantDoIt

27 stop alert

You cannot do that to this kind of selection.

: phUnchanged = 28; {used in both save & continue and revert to previous version}

28 note alert

The document has not changed since you last saved it.

: phSaving = 29;

29 wait alert

?0 is saving the new version of your document. ?L ?L

To terminate the operation, hold down the Apple key while you type a period.

: phTerminated = 30;

30 stop alert

?0 terminated the operation because you typed Apple-period.

: phEditClip = 31;

PROCEDURE {TSelection.} DoKey
 FUNCTION {TPanel.} downAt

31 stop alert

You cannot edit on the Clipboard.

: phNoClip = 32;

32 stop alert

There is nothing on the Clipboard to Paste.

: phUnkClip = 33; {the application could not understand what was on the clipboard}

33 stop alert

?0 cannot Paste what is on the Clipboard.

: phDialogUp = 34;

FUNCTION {TPanel.} DownAt

34 stop alert

You must dismiss the Dialog Box before you can change the selection.

```

:   phCantUndo      = 35;
:   PROCEDURE (TWindow.)UndoLast;
35 stop alert
10 cannot undo "1K"

:   phNoCommand     = 36;
:   PROCEDURE (TWindow.)UndoLast;
36 stop alert
10 cannot undo the last change because there have been no changes.

:   phOlderVersion  = 37;
:   PROCEDURE (TDocManager.)Assimilate
37 caution ok alert
The document you are opening was last worked on using a release of 10 that lacked
some features of the present release. 1L1L
If you click OK, 10 will update the document to work with the present release. 1L1L
If you click Cancel, 10 will not open the document.

:   phNewerVersion  = 38;
:   PROCEDURE (TDocManager.)Assimilate
38 caution insist alert
The document you are opening was last worked on using a release of 10 that had
some features the present release does not have. 1L1L
If you click OK, 10 will remove from the document anything that required the extra capabilities;
if you open the document later using that other release of 10, some information will probably be missing. 1L1L
If you click Cancel, 10 will not open the document; if you open it later using that other release of
10, nothing will be missing.

:   phConverting    = 39;
:   PROCEDURE (TDocManager.)Assimilate
39 wait alert
10 is converting the document to work with the present release of the tool.

:   phAborting      = 40;
40 wait alert
10 is terminating the current operation because you typed Apple-period.
