

ISYS

The Integrated System for the **CORVUS CONCEPT.**

*An Entire Software Library
in One Program.*

When you purchase ISYS you know you're getting your money's worth. All you need to buy is one program. That's because ISYS provides a wealth of applications at an inexpensive price.

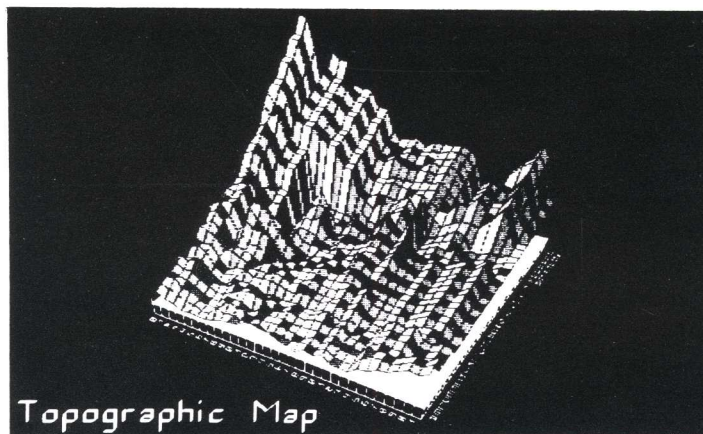

ISYS includes professional quality word processing, a complete spreadsheet, and high-resolution three-dimensional business graphics. Easy to use list management, advanced data communications, sorting, quick information lookup, calendar, international clock, and calculator are all included at no extra cost.

That's enough to replace most software libraries. ISYS is more than just a lot of applications though. It actually shares information among applications, unlike independent data produced by most application developers.

Truly Integrated

Sharing data means that you are capable of doing much more than simply spreadsheet "what ifs." For instance, spreadsheet data can be used in word processing, or it can be graphed.

One of the most useful applications of integration is managing lists. A list can be created with the List Manager. It can be used as an instantaneous address and

phone directory too. Additionally, the lists can be transferred into word processing, the spreadsheet, the sorting application, or transferred to another computer. That is what we call integration!

Powerful Applications

Each application within ISYS was developed separately. This gives you fully-featured applications that are each extremely effective. The goal was to provide a complete solution to most office needs. With ISYS, Corvus has met that goal.

The word processing application is among the best at any cost. There are more than 140 functions available at the touch of a key. Plus it boasts unique features such as

Undo/Redo and Page Layout.

Undo takes the worry out of making changes, because by pressing the Undo function key you can undo every change back to the original document, one step at a time. Page Layout previews the format of 25 pages at one time. You no

longer have to print your rough drafts.

The three-dimensional graphics create impressive presentations every time. And with over 80 pre-defined templates Graph takes little time to learn. Comparable graphics programs can be found only on minicomputers and mainframe systems.

Let ISYS replace your software library.

★★ **CORVUS SYSTEMS**
★ ★

ISYS

- Integrated System environment
- Suspend/Resume
- All function-key driven—no control codes to remember
- Horizontal or vertical display
- Supports Inter-Process Communication files (IPC)
- Sophisticated applications
- Multiple windows
- Three independent programs for bit mapped images: window save, window edit, window play

WORD PROCESSING

- Full page display
- Display of underline, bold, superscript, etc.
- Multiple level Undo/Redo
- Form letters with mail-merge
- Function-key driven
- Supports ISYS Suspend/Resume
- Supports IPC files for data transfer
- More than 140 functions
- Easy access to all functions
- Background information saving prevents loss of data
- Document page layout preview
- Automatic word wrap
- Automatic centering
- Insert text from another file
- Control page breaks
- Go to character/word/line/paragraph/page/first/last/etc.
- Selective page printing
- Automatic indexing
- Paragraph adjust with five formats within a document
- Hyphen help
- Global search and replace
- Cut and paste
- Block and string cut
- Word and sentence delete
- Tab and margin saving
- Integrated with other applications

SPREADSHEET

- Complete spreadsheet program
- Two times as many cells displayed
- Function-key driven
- 255 rows by 100 columns
- "No mistake" Undo feature
- Independent column widths
- Supports ISYS Suspend/Resume
- Supports IPC files for data transfer
- Table lookup
- Internal Rate of Return
- Net Present Value
- Selective column display
- Mark/Bound transfer
- Quick 2-D graphics
- 3-D business graphics are integrated
- Flexible go to commands
- Forms mode
- User-defined functions
- Title entries displayed over multiple columns
- Recalculate with 15 digit precision
- Integrated with other applications

GRAPH

- Three dimensional business graphics package
- Designed specifically for the Corvus Concept
- Mainframe 3-D graphics capabilities
- Uses Concept high resolution display
- Function-key driven
- Automatic draw (first time users): 83 preconfigured templates, automatic adjustment to data
- Interactive mode (advanced users): control 3-D perspective, control character fonts, change any of 300 template parameters, save new templates
- Input sources include spreadsheet, word processing, IPC files, manual input
- Vector written fonts
- Graphs can be scaled to fit different sizes
- Three dimensional graph types include: bars, pies, lines, ribbons, outline, surface, and custom
- Supports ISYS Suspend/Resume
- Integrated with other applications

DATA COMMUNICATIONS

- Terminal emulation (DEC VT-100)
- Modem control
- Binary file transfers (Modem-7 protocol)
- Function-key driven
- Supports ISYS Suspend/Resume
- Supports text file Send/Receive

LIST MANAGER

Uses IPC files

- Simplified form letter capabilities
- Easy entry and editing of mailing lists
- Selected printings by chosen fields
- Integrated with other applications

LOOKUP

- Half-second information retrieval
- Search by fields
- From 1000 to 2000 entries
- Create sub-lists
- Integrated with other applications

SORTFILE

- Sort by field
- Ascending or descending order
- Disk based sort
- Integrated with other applications
- Fast

CALCULATOR

- Uses full numeric keypad
- Uses function keys
- Standard desk calculator
- Add, Subtract, Multiply, Divide
- Other math functions

CLOCK

- Time of day
- International time zones
- Stop watch with interval timer

CALENDAR

- Display month at-a-glance
- Previous/Next Month/Year
