

## **LOGIC SYSTEMS DIVISION**

### **64000 Logic Development System**

#### **Document Catalog**

This catalog provides an extensive list of commonly used operating and service documents published by the Logic Systems Division. It is published quarterly to coincide with scheduled Software Subscription Service updates.

The catalog is organized by 64000 Logic Development System hardware and software active product numbers. For each of the product numbers, applicable current part numbers, type, description and print dates are shown. Any change sheets for the manuals are listed by issue designator and print date of the change sheet<sup>1</sup>. Where possible, the software revision (SW REV) code indicates the current version of the product software. For example, a code of 1.XX indicates the manual(s) applies to all revisions of the software that begin with 1.

Manuals may be ordered through your local Hewlett-Packard Sales/Service Office or within the USA, through a direct mail order system. Order forms and specific information are available through your local HP office.

<sup>1</sup> Change sheets are considered an integral part of the manual, and are not available for order separately. Any change sheets applicable to a manual are included when you order the manual by the HP ten-digit part number.
