Release Information

DNOS Performance Package, Release 1.2.0

Table of Contents

SECTION 1 IMPORTANT INFORMATION

SECTION 2 DIFFERENCES IN DPP 1.1 AND DPP 1.2

SECTION 1

IMPORTANT INFORMATION

The release of DNOS installed on your system must be the same as the release of the DNOS Performance Package. You must have DNOS 1.2 installed before installing release 1.2 of the DNOS Performance Package.

SECTION 2

DIFFERENCES IN DPP 1.1 and DPP 1.2

The DNOS PLUS portion of the DNOS Performance Package has been modified slightly to correct several errors and to ensure that it runs only with DNOS 1.2.

The COBOL PLUS runtime installation process has been modified. If you are running COBOL 3.3.3, the COBOL PLUS runtime will be installed with the DNOS Performance Package. For COBOL 3.4 and later releases, the COBOL PLUS runtime ships with the standard COBOL package. If you have COBOL 3.4 or a later release, no COBOL runtime will be installed during the installation of the DNOS Performance Package.
