PERIPHERAL HARDWARE

MAINTENANCE MANUAL

VALID

900-00025 Rev A

PREFACE

The Peripheral Hardware Maintenance Manual includes a number of
vendor manuals that describe the various peripherals used in the
SCALDsystem. The maintenance manual uses index tabs to separate
the various manuals; in some cases, two manuals are included
within the same index tab when a peripheral is supplied by two
manufacturers. Also, several index tabs do not contain manuals;
the manuals for these tabs are system-dependent and are packaged
separately.
