

## Dear HP Channel Partner,

The customizable flyer on the next page was developed to help you ask your best midsize customers and prospects to attend an important launch event for the HP ProLiant 100 family of servers. You can customize the flyer in order to come up with the invitations that work best for you. Here's how:

1. Delete the logo placeholder and replace it with your own logo. Once your logo is on the page, double click on it and select **Layout** and then **Square**. This will make your logo easy to move around on the page.
2. Replace **www.yoururl.com** at the bottom of the page with your actual company URL.
3. Edit the text to best describe your event; don't forget to double-check dates and spelling and add any promotions, sales or pricing.
4. Print the flyer.
  - If you do not print in-house, the best way to deliver the file to a printer is as a .pdf. To generate a .pdf, go to **File, Print**; instead of choosing a printer, choose '**Adobe pdf**'. Remember to only print page two.
5. If you have any difficulty viewing the next page, go under **View** in the task bar and click **Print layout**.

Servers you can grow with.
