
E7806A - PDU Power Cord without a Plug

Technical Data

**Product Number
E7806A**

Connect a modular PDU to a power source.

The E7806A power cord is used to connect any 16 amp modular Power Distribution Unit (PDU) to a power source. The power source can be a wall branch circuit or UPS.

Features

- 100-240VAC
- 16 amp maximum
- Length: 4.5m (177.2in)
- Plug: Unterminated

What you get in the box

- 1 power cord

Installation

IMPORTANT: A technically qualified person must install the plugless end.

Plug the C19 connector end into the C20 inlet of the PDU. The plugless end must be connected to a minimum 16 amp rated grounding-type plug or directly to electrical terminals in accordance with local electrical codes.

Tools required for installation:

- Phillips #1 screwdriver (only needed if using the PDU retaining clamp to secure the cord to the PDU.)
- All tools needed for correct installation of plugless end by a technically qualified person.

Certifications

- VDE and OVE with harmonized cable.
