
J1508A - Side Panels for HP Rack System/E25

Technical Data

Product Number
J1508A

Easy access to the side of rackmounted equipment with modular snap on/off side panels

The HP Rack System/E25 utilizes light weight, modular, snap on/off side panels. Side panels come as kits to cover both sides of the rack. The modular design of the side panels allow easy access to specific racked equipment. No tools are required for easy installation.

The J1508A side panel kit is used only with the HP Rack System/E25 (J1502A).

Features

- Snap on/off design requires no tools for installation or removal
- Modular design makes handling easier and allows access to specific racked equipment
- Elegant design detail

Installation

Flexible tabs on both ends of the side panels fit into cut-outs on the corresponding rack columns. Simply align the tabs and snap side panel into place.

Tools required for installation:

- None
