# J1511A - Front Door for HP Rack System/E25

## Technical Data

**Product Number**  
**J1511A**

---

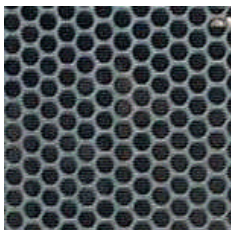

### Control access while allowing airflow to rack mounted equipment

Attractive, sturdy front door provides security and pleasing aesthetics.

The J1511A perforated front door is used only with the HP Rack System/E25 (J1502B, A4900A & A5134A).

### Features

- Solid construction
- 63% perforation in door optimizes ventilation
- Equipment is visible through the perforations
- Lockable latch secures equipment in rack
- Can be mounted to open from the right or left
- Quick disconnect hinges

**63% perforation provides optimum ventilation**

### Installation

Attach hinges to the pre-threaded inserts in the front column. Attach the latch catch on the opposite column. Fit the door hinge pins into the column mounted hinges. Attach the ground cable to the rack base and door.

Tools required for installation:

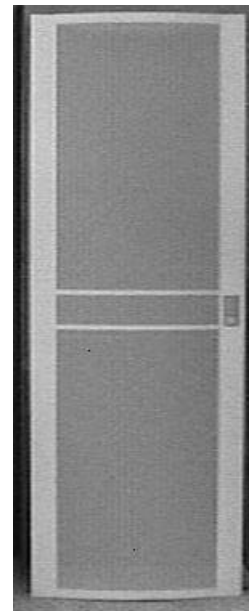

- Torx T25 screwdriver
