How To Use This Document

The **HP StorageWorks Enterprise Backup Solution (EBS) Compatibility Matrix** provides information for designing data protection solutions that scale from entry-level workgroups to enterprise-level datacenters. It includes support for Direct Attach SCSI (DAS), Direct Attach Fibre (DAF), and Storage Area Network (SAN). It does not imply product availability. Products highlighted in yellow will be removed from the EBS Compatibility Matrix in the next release. Previous versions of the EBS Compatibility Matrix are available on the web at www.hp.com/go/ebs.

Each application listed in the EBS Compatibility Matrix is classified as either Extended Solution Interoperability or Tape Device Compatibility. See below for more information:

Extended Solution Interoperability: HP performs on-going interoperability and extensive solution testing to provide fully certified and supported data protection solutions with these applications. In addition to HP tape automation products; these solutions are verified with a variety of servers, operating systems, host bus adapters, switches, disk arrays, and storage software in complex, heterogeneous SANs. Detailed support information for these solutions can be found in this document.

Tape Device Compatibility: Tape device compatibility is verified and supported with these applications through a cooperative test effort with the software vendor. Tape device support can be found in this document. Contact the software vendor for application version information and interoperability details.

See the [Libraries and Applications](#) page for application support.

Additional technical information can be found in the Enterprise Backup Solution Design Guide and various Backup Application Implementation Guides located on the web at www.hp.com/go/ebs. For information on stand alone tape products and compatibility, go to www.hp.com/go/connect.

NOTES: section contains specific configuration details

- NOTES:**
 1) Other Operating Systems may be supported within EBS by the respective ISVs as LAN clients.
 2) Please reference your ISV support matrices for supported application and operating system version compatibility.
 3) ATS is not supported.

- 4) Refer to [EBS Design Guide](#) for configuration rules and guidelines.
 5) For Boot from Tape support, [click here](#), and select the type of tape for compatibility.
 6) Refer to the [EBS Design Guide](#) for details on failover configurations. For Operating Systems not listed, please refer to the ISV's web page for supported High Availability configurations.

	1/8 DLT Tape Autoloader (vs80)	5E40 (v65)	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓					

NOTES:
 1) See "How To Use This Document" for description of support.
 2) The HP StorageWorks SDLT 600 and/or Ultrium 960 Tape Drives include support for WORM (Write-Once, Read-Many) functionality. WORM implementation is dependent on the backup application.
 3) Minimum supported version is 1.0.4.

4) Autoloaders are only supported in Direct Attach SCSI configurations
 5) Ultrium drives are not supported with ESL9198 and ESL9326 libraries
 6) Refer to the EBS Design Guide for additional information on the use of native backup commands and programs.

Advanced Library Features

DAS, DAF, and SAN Support	HP Data Protector	CA BrightStor ARCserve	EMC Legato NetWorker	IBM Tivoli Storage Manager	Symantec Backup Exec	Symantec NetBackup
Enterprise Libraries	IMPORTANT: See the Backup Application Details page for the latest supported versions of backup software.

NOTES:

- 1) Serverless backup supported in single path configurations only.
- 2) Serverless backup not supported with 5.3.0b or 5.4.25 NSR firmware.
- 3) Serverless backup is restricted to Qlogic Windows driver version 8.2.0.73 or any version of Emulex HBA driver.
- 4) Windows 2000 ServerFree opt with HSG, EVA, MSA1000 only.

- 5) Supported with Solaris 8 & 9, VERITAS NetBackup 4.5 and 5.X, nbu_snap with HSG and EVA only (master router configuration not supported).
- 6) Serverless Backup functionality is not available with the e1200-160 interface controller.
- 7) Supported with XP128/1024 and version 5.1.08 of NSR firmware.
- 8) The LUN ID of the disk volume to be backed up must be the same for the host and the interface controller.

NOTES:

- 1) Other Operating Systems may be supported within EBS by the respective ISVs as LAN clients.
- 2) Please reference your ISV support matrices for supported application and operating system version compatibility.
- 3) ATS is not supported.

- 4) Refer to [EBS Design Guide](#) for configuration rules and guidelines.
- 5) For Boot from Tape support, [click here](#), and select the type of tape for compatibility.
- 6) Refer to the [EBS Design Guide](#) for details on failover configurations. For Operating Systems not listed, please refer to the ISV's web page for supported High Availability configurations.

NOTES:

- 1) Other Operating Systems may be supported within EBS by the respective ISVs as LAN clients.
- 2) Please reference your ISV support matrices for supported application and operating system version compatibility.
- 3) Refer to [EBS Design Guide](#) for configuration rules and guidelines.

- 4) EBS is not dependent on specific kernel errata levels. For required/supported kernel errata, refer to your online storage array and backup application support documentation.
- 5) 3rd Party adapters require HP drivers and firmware.

MSA1000 ²	✓	✓	✓	✓	✓	✓

NOTES:

- 1) Consult with your hp solutions provider for disk array SAN compatibility information
- 2) For compatibility information about the optional MSA SAN Switch, refer to the [Infrastructure](#) page within this document for support details
- 3) Supported with Fibre Channel and FATA disk drives.

- 4) LINUX and Windows support only
- 5) Windows support only
- 6) VA7xxx arrays require separate HBA's for disk and tape.
- 7) Supported with VCS 3.X and 4.X.

Symantec Backup Exec for Windows Servers	10.1.5629	Backup Exec Supported Devices	BE Driver for Windows
Symantec Backup Exec for NetWare	9.2.1391	Backup Exec Supported Devices	BE Driver for Netware
Symantec NetBackup	6.0	NetBackup Supported Devices	HP or NBU Tape Driver for Windows

IMPORTANT: Each application is supported with its latest maintenance release unless otherwise noted. Consult with your application vendor for minimum application versions, patches, builds, and/or drivers for support of your HP tape automation or HP virtual library products.

NOTES:

- 1) All ISV certifications have been completed with a minimum configuration of 16 servers by 16 drives. This does not imply any limitations of the backup and restore application or HP StorageWorks SAN products. Refer to the application vendor's website or representative for maximum configuration details.
