

# Reference

## Server Board Component Layout

- A: Hard Disk Drive LED Header
- B: Serial Port A Header
- C: Status LED
- D: Battery
- E: ID LED
- F: Full-height Riser Connector
- G: POST Code LEDs (four)
- H: Low-profile Riser Connector
- I: Back Panel I/O Connectors
- J: DIMM Sockets (six -- from left to right: DIMM 3A, DIMM3B, DIMM 2A, DIMM 2B, DIMM 1A, DIMM1B)
- K: CPU1 Fan Header
- L: CPU1 Socket
- M: CPU2 Socket
- N: CPU2 Fan Header
- O: Processor Power Connector
- P: Fan Pack Header
- Q: Floppy Drive Connector
- R: PCI Fan Header
- S: Primary IDE Connector
- T: Floppy / Front Panel / ATA (connector for optional backplane)
- U: Main Power Connector
- V: 50-pin Front Panel Connector (optional, may be used for non-Intel chassis)
- W: 34-pin Front Panel Connector
- X: Configuration Jumpers
- Y: SATA 1 Connector
- Z: SATA 0 Connector
- AA: Power Supply Signal Connector
- BB: Optional RMC Connector
- CC: Front Panel USB Header
- DD: IDE Flash Power Connector
- EE: BIOS Select Jumper
- FF: Chassis Intrusion Header

## Making Connections to the Server Board ... Quick Reference

Required Connections for Selected Chassis		SR2400
D.	+12V CPU Power Connector	■
L.	Main Power Connector	■
J1.	Front Panel Connector	■ (only if backplane is not installed)
J2.	Front Panel Connector	⊘ (not used for SR2400 chassis)
J3.	Backplane Connector	■ (only if backplane is installed)
K.	Serial ATA Connectors	■ (one required, one optional)
L.	Auxiliary Signal Connector	■
N.	Front Panel USB	■
P.	Chassis Intrusion	■

⊘ = Do not connect  
■ = Make this connection

CPU/System Fan Connections for Selected Chassis		SR2400
B.	CPU1 Fan Header	⊘ (not used for SR2400 chassis)
C.	CPU2 Fan Header	⊘ (not used for SR2400 chassis)
E.	System Fan Module Header	■
G.	PCI Fan Connector	■

⊘ = Do not connect  
■ = Make this connection

Optional Connections for Selected Chassis		SR2400
A.	Serial Port A	■
F.	Floppy Drive	■
H.	Primary IDE Connector	■
M.	RMC Connector	■
O.	IDE Flash Power Connector	■

■ = Make this connection

Note: Not all optional connections are shown in this diagram. Refer to your Intel® Server Board SE7320VP2 User Guide and your server chassis documentation for additional connection information.

## Common Problems and Solutions

For a list of hardware components that have been tested with this system, see: <http://support.intel.com/support/motherboards/server/se7320vp2/>

The system does not boot or show video at power-on.

- Check that +12V CPU power connector is plugged in. Without this cable the processors will not have any power.
- If configuring with only one processor verify that the processor is in the Primary Processor socket (CPU 1).
- Remove and replace DIMMs one bank at a time to isolate which one is causing problems.
- Remember, all DIMMs must be:
  - Registered DDR266/333 compliant.
  - The same speed.
  - From the same manufacturer.
  - Installed in pairs, beginning with DIMM 1A and DIMM1B (a single DIMM may be used in either DIMM 1A or DIMM1B).
  - Installed with no empty sockets in between filled sockets.
- Your power supply must provide a minimum of 450W with 1.2A standby current, which complies with the SSI EPS 12V specification.

The system sometimes works, but is exhibiting erratic behavior.

- This is typically the result of using an under-rated power supply. Make sure you are using at least a 450W power supply.

Accessories and Order Codes	
Chassis Spares	ADR2UCHSPRKIT
Electrical Spares	ADW1UEESPRKIT
2U Low-profile Riser	ADRLPRISER
2U Full Height PCI-Express Riser	ADRPCIEXPR
2U Full Height PCI-X Riser	ADRPCIXRIS
2U SATA Backplane Kit	A2400SATAKIT
Tape Accessory Kit	ADRTAPEKIT
6th Drive SATA	ADRSIXDSATA
2U Redundant Fans Kit	ADRREDFANS
700 Watt Power Supply	ADR700WPS

A complete list of accessories and spares can be found at: [www.intel.com/go/serverbuilder](http://www.intel.com/go/serverbuilder)
