

ULOCKID(a)

ULOCKID(a)

NAME

unlockid -- decrement lock count of segment

SYNOPSIS

(unlockid = 15.)
unlockid(segid)

DESCRIPTION

The lock count on the segment *segid* is decremented. A value of 1 is returned from C.

ALSO SEE

alockseg(a), lockseg(a), lockid(a), unlockseg(a)

DIAGNOSTICS

C returns -1 if *segid* is not a valid segment id. Fault return with code 10 if *segid* is not locked in memory.
